Long Island NLP Training

NLP Basic Practitioner Certification Course *Skills for success!*

The Lindner Long Island NLP Training @NYHTC

Neuro-Linguistic Programming is about personal excellence, and being our best. You may have asked yourself these questions:

How can I become better, more effective, more efficient and more successful in what I do?

Many programs encourage you to produce excellence, but NLP teaches you to reproduce it in your own way! In other words, you don't have to go out and re-invent the wheel to become good at something or great at something you're already good at.

You'll learn "how to" in this course:

- Be able to build rapport with anyone.
- Remove the emotional charge from unpleasant memories.
- Eliminate and remove difficulties in your work and personal life by recognizing and altering the patterns that create them.
- Control almost any situation.
- Improving and using states of mind.
- Catapult yourself to great success using the secrets of managing your emotional states.
- Create useful states of mind, and use the best states of mind at the worst of times.
- Break out of unwanted emotional states of mind at will.

And more...

You will learn to:

- Be your best in tough situations all the time.
- Turn problems and obstacles into springboards for success.
- Speed up your learning in any field.
- Make dramatic, positive changes in the way you think, feel and act.
- Successfully get your message across, every time. Detect patterns in human behavior.
- See and hear more efficiently as you improve your sensory acuity.
